

Antigua's Investment Climate

PRESENTED BY
PATRICK RYAN

Investment Opportunities
in small developing
countries are limited due to
their size,
economy and population

The OECS has a Stock Exchange,
however it is not very active

**Antigua and Barbuda does
not have any companies
listed.**

Most investors in the OECS hang on to investments and leave it to their children

Few businesses are traded – it is mainly properties that are bought/sold

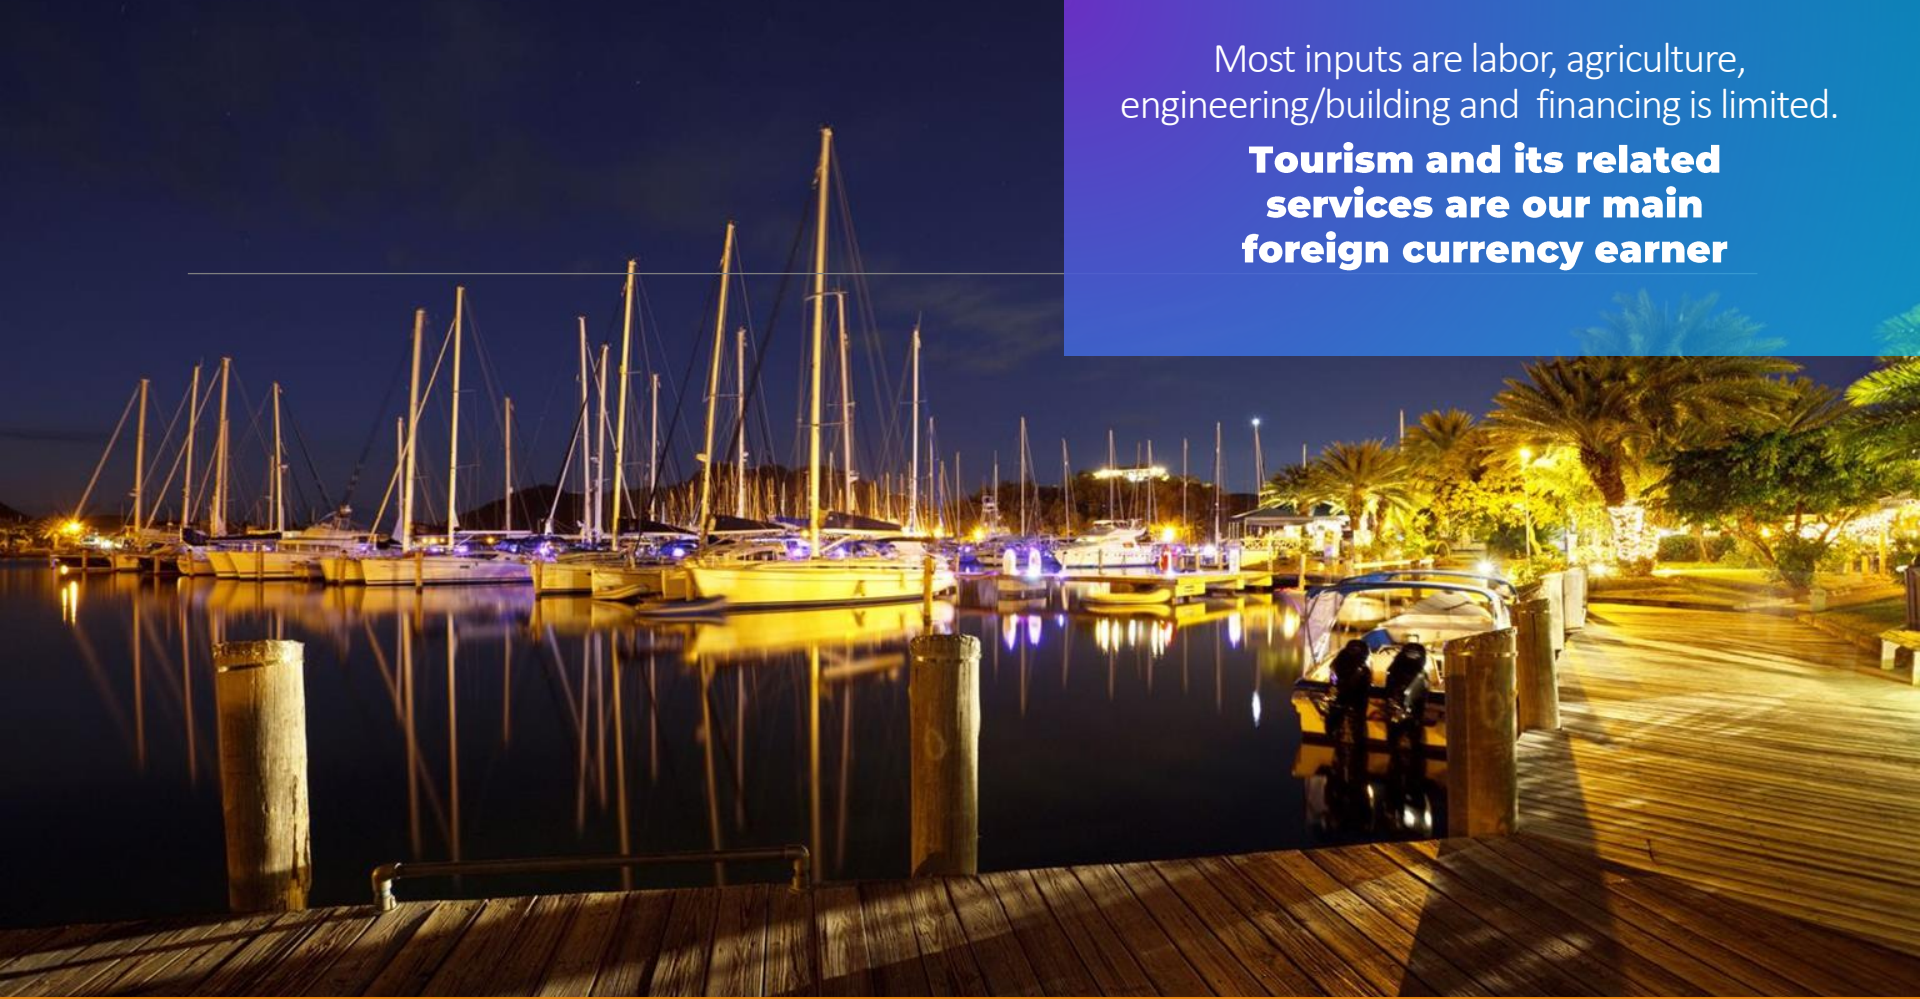

Caribbean countries have micro populations
and new businesses compete with existing businesses

New ideas or activities are challenging.

Most inputs are labor, agriculture, engineering/building and financing is limited.

Tourism and its related services are our main foreign currency earner

Examples of relatively new economic drivers is the expansion of street food as it has exploded due to our busy lives.

Economies grow by getting funds into circulation

USA and MDC are experts in this...

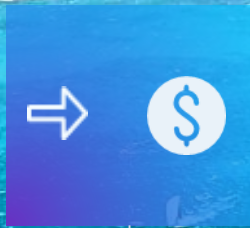

Short Story

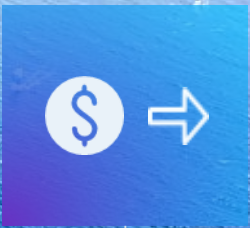

Short Story

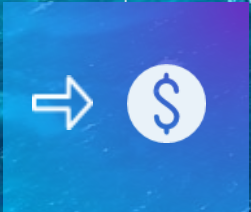

Wholesaler
pays broker

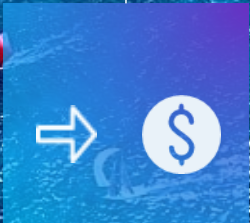

Shipper
pays
Insurance

Guest House
refunds \$100

Broker pays
Shipper

Insurance
pays
Guest House

This story shows that money in circulation
creates economic activity

All sectors benefit, including
Government revenues, through licenses,
corporate or un-corporate taxes, duties,
tariffs ABST

**Employment opportunities
are also created**

Economists indicate that the longer you can keep money in circulation, the more vibrant the economy

Each spend (spin) benefits all

MAKE LOCAL,
BUY LOCAL
and
INVEST LOCALLY

**Governments offers
concessions to attract FDI.
Large amounts of capital
required**

Our goal is to present projects on a large scale which are broken down into a type of Co-operative.

**This is not a group investment
where one is dependent on
others to make decisions.**

**Think of a JIGSAW puzzle.
You get to own your own little
piece**

**English Harbour & Jolly Harbour
have become hubs with restaurants,
retail shops, Yacht repairs, Laundry,
Hairdressing/nails services,
Car & Boat rentals etc.**

Thank you
for listening
